# Close the achievement gap for English learners with Amplify Reading.

It's critical to support English learners (ELs) with proven strategies in the classroom. Amplify Reading, an adaptive K–8 literacy program, provides educators with a supplemental resource that does just that.

In a semester-long study with a large urban district in California, students who used Amplify Reading made “above typical” progress from the beginning to the end of the year, measured with DIBELS Next. For example, in kindergarten, **50%** of students enrolled in Amplify Reading made “above typical” progress, whereas only **41%** of students in the comparison group made “above typical” progress.

## Amplify Reading helps English learners close the achievement gap.

The performance gap between English learners and non-English learners was smaller for students who used Amplify Reading. For example, kindergarten English learners not using Amplify Reading had a performance gap of **20 DIBELS composite score points** behind their non-English learner peers. **For those using Amplify Reading, this gap was only 13 points.**

## Amplify Reading supports English learners with proven strategies

1. In *Amplify Reading*, much of the engagement narrative is available in Spanish. We are actively building Spanish support across the program.

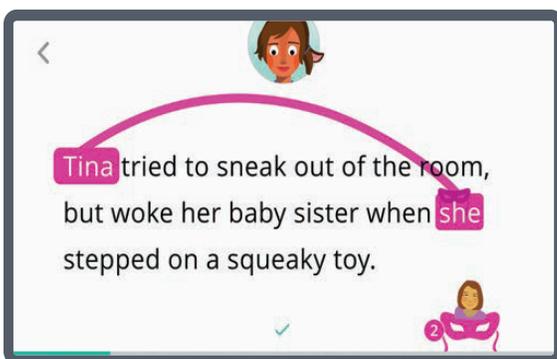

2. Many activities have Read Aloud and picture supports, which provide scaffolding for ELs to participate in comprehension and vocabulary activities, whatever their level of language proficiency.

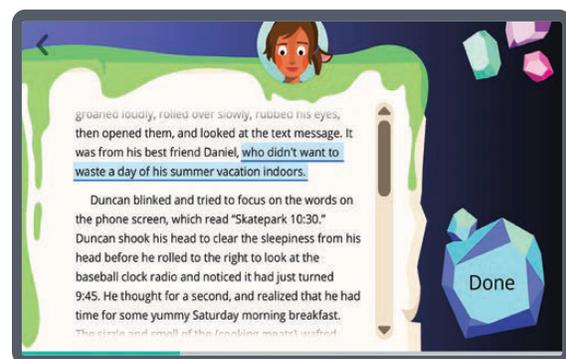

3. *Amplify Reading* provides robust instruction in phonics and phonological awareness, including at the syllable level.

4. . . .and explicit instruction in morphology, providing strategies to help build vocabulary during independent reading, which has been shown to be especially helpful for ELs.

5. *Amplify Reading* also includes multiple games that provide explicit language instruction—for example, on connectives, anaphora, idioms, and words with multiple meanings...

6. . . .and strategy instruction in comprehension monitoring, which has been shown to be particularly helpful for ELs.
