2021 Data sharing overview

This is a guide for sending enrollment data through Clever, Classlink, GG4L Connect, Amplify Enrollment Portal, and SSE. You can also reach out to your Enrollment and Licensing (E&L) contact for more details. To find out which is the right method for your district, you can use our **enrollment web tool**.

Clever

- Register via Amplify's Clever signup page
- Set up your Clever account to sync with Amplify
- Set up sharing permissions
- Validate enrollment information and confirm shared data with your Amplify E&L contact
- Amplify reviews and verifies the data

ClassLink

- Share Roster with Amplify Curriculum App in ClassLink's RosterServer
- Configure the oAuth2 App in ClassLink's App Library
- Share the district Tenant ID and SourceID for the district object via Egnyte
- Confirm shared data with your Amplify E&L contact
- Amplify reviews and verifies the integration

GG4L Connect

- Complete the GG4L Onboarding Form
- Activate the Amplify application from your Application gallery
- Set up your Custom Data integration
- Send your request and confirm integration with your Amplify E&L contact
- Amplify reviews and authorizes the integration

Amplify Enrollment Portal

- Choose to upload your OneRoster CSV file or connect to the SFTP
- Upload and review data, and apply sharing rules
- Connect to Amplify Export applicatiion
- Approve data request from Amplify
- Amplify reviews and verifies the data

SSE

- Ensure your spreadsheets are set up correctly and in CSV format
- Upload your spreadsheets into Self-Service Enrollment
- Use SSE's tools to make your CSV file compatible with the Amplify system
- Review and submit data based on provided recommendations
- Amplify reviews and verifies the data
