

Preparing Your mCLASS® TX Materials

Congratulations on your selection of mCLASS® Texas! A full K–6 assessment solution, mCLASS Texas enables you to leverage and connect valuable student data from the beginning of their literacy journey to later grades, reflecting a reliable and valid view of every student's progression.

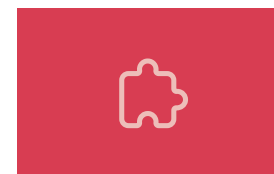

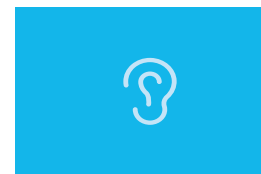

Accessing Materials and Kits

- If you need the DIBELS® 8th Edition and/or inventory (PA-Blending and FSL) materials, you can download them for local printing directly from the mCLASS Home Training page (login required). Lectura Benchmark materials can be downloaded starting July 1, 2022, and Lectura Progress Monitoring Materials can be downloaded starting August 1, 2022.
- If your school or district purchased materials kits, the materials coordinator at your school or district will receive a shipping logistics survey after your order is placed, to ensure a smooth delivery of mCLASS Texas Edition kits. It is critical that this survey be completed before the shipment of materials. If you are the materials coordinator for your school or district and have not received a survey, reach out to your Amplify customer success team member.
