Unit 1: Personal Narratives (19 Days)

Reader: Personal Narratives

This unit examines the genre of personal narratives, which consists of works of nonfiction written by a first-person narrator involved in the events being described. Students read five personal narratives, identifying and using the elements of the genre throughout the unit in writing a variety of their own personal narratives. These elements include events proceeding in a logical sequence, dialogue that shows character, vivid descriptive language, characters with defining traits, sensory details, figurative language, and writing strong introductions and conclusions. Examining the genre in this way will help students build their knowledge of descriptive writing. Some of the genre features are elements students may have studied in fiction-based units in earlier grades. This unit is unique, however, in that the authors of the narratives that students will read describe real events or experiences. Students make meaning from these texts by learning to read them critically and closely, improving their facility in literal comprehension and making text-based inferences. Moreover, examining and utilizing the features of the genre in composing works about their own lives should help students write with increased focus and clarity, and reflect on, as well as make meaning from, their own experiences.

NOTE: This unit also includes a Beginning-of-Year (BOY) assessment to help determine whether students have adequate preparation for Grade 4 CKLA instruction.

Unit 2: Empires in the Middle Ages, Parts 1 and 2

(29 Days)

Reader: *Empires in the Middle Ages*

The Empires in the Middle Ages unit covers the history of both the Middle Ages in Europe and the Islamic Medieval Empires. The Middle Ages in Europe and Islamic Medieval Empires units have always been companions in the Grade 4 sequence because their subjects are highly related. While the Middle Ages deals primarily with the events of western Europe, and the relationship between the Christian Church and the rulers of the region, the concurrent Islamic Empires in the Middle Ages unit looks at events in another part of the world (particularly in what is now called the Middle East). Separated by the Mid-Unit Assessment, the two topics of study are tied by a common past (the decline of the Roman Empire) and intersecting events such as the Crusades and the movement of knowledge, philosophy, and science from Greek into Arabic into Latin. They are also tied by their impact on the present: it is difficult to understand the modern world without knowing about these two regions and their medieval history.

Unit 3: Poetry (18 Days)

Reader: *The Poet's Journal*

For many readers—adults and children alike—poetry can be challenging. Readers often find poems inaccessible, suspecting a secret meaning they cannot decode. In fact, poetry’s reliance on symbolic and figurative language opens up rather than closes off meaning, giving readers the power of personal interpretation. This unit gives students tools and strategies for approaching poetry, training them in the methods and devices poets use and equipping them to read and interpret both formal and free verse poems. It gives them continual opportunities to create poems themselves, allowing them to practice what they have learned.

The poems in this unit represent a wide variety of time periods, from Kshemendra’s twelfth-century treatise on the responsibilities of poets to the work of living writers such as Sherman Alexie and Harryette Mullen. We haven’t chosen poems written specifically for children; we have instead selected poems both younger and older readers will enjoy. The poets come from many backgrounds and nations; the poets included are European, Asian, African American, Native American, and Hispanic. The poems themselves are similarly diverse; some employ precise meter and rhyme schemes, while others use free verse. Uniting them all is their engagement with language and its potential.

Unit 4: Eureka! Student Inventor (10 Days)

Reader: *Eureka! Files*

Eureka! Student Inventor is a 10-day ELA Quest. Quests are narrative-driven units that immerse students in close reading adventures. Through them, students read complex literary and informational texts and consistently demonstrate their ability to find evidence and use it appropriately. Over the course of the Quest, students write routinely in opinion, informational, and narrative modes, adjusting style for the task and audience indicated. Beyond this, Quests are deliberately varied. Each aims to immerse students in a new world, with new content and challenges. Quests are also more flexible than other units. We have provided suggestions for how to customize the Quest throughout and encourage you to make your own variations to suit your students' needs.

As they go through Eureka! Student Inventor, students read a range of informational texts about inventors, inventions, and the process of creation. In addition to close readings, students analyze objects and situations in the world around them, identify problems, create evidence-based solutions, and ultimately become inventors themselves. By routinely writing informational and opinion pieces, students practice research, observation, communication, and persuasion. They also engage in a range of collaborative discussions, sharing ideas and working in teams with defined roles and agreed-upon rules. In Eureka! Student Inventor, students are contestants on the bizarre and exciting reality TV game show of the same name—a show in danger of cancellation because of a few . . . unfortunate . . . incidents last season. Students are divided into teams (labs) and participate in activities and challenges both in groups and individually. Guided by inventor-judges Jacques Cousteau, Hedy Lamarr, Thomas Edison, and George Washington Carver, as well as a host—you, the teacher—contestants learn about the process of invention through examples and experiments. Throughout the Quest, the judges gameshow “world.” We have provided host scripts throughout the unit and hope you will add in your own elements.

Unit 5: Geology (19 Days)

Reader: *Geology: The Changing Earth*

The Big Idea of this unit is that the earth is composed of layers that, through heat and pressure, cause movements that result in geological features above and below the earth's surface. Tectonic plate theory explains how mountains, volcanoes, and trenches are created on land and under the sea. Information about the rock cycle, weathering, and erosion also explains how the earth is continually changing. This unit explores the relationships between these different geological processes and how they affect the landscape and related environments of the earth.

NOTE: In this unit a Middle-of-Year (MOY) Assessment is provided and should be administered at the end of the unit.

Unit 6: Contemporary Fiction (15 Days)

Writer’s Journal: Contemporary Fiction

We chose *The House on Mango Street* (HOMS) because it combines rich, lyrical, yet accessible language with narrative and a protagonist with whom students can identify.

That makes HOMS an ideal unit for close reading. It is important that students learn to be slow, careful readers who can peel back many layers of meaning in a text. HOMS rewards that kind of persistence and patience. For that reason, we will return to vignettes more than once, on each occasion conducting new analysis and finding more in the text.

In some ways, HOMS is a bridge between poetry and the narrative stories students will be accustomed to—and which they will encounter again in the next unit (*Don Quixote*). The author called the first few chapters “lazy poems”—they are short and relatively standalone, with imaginative and sometimes abstract use of language. But they are still stories, with a narrative that propels the reader through the book. Of course they are not lazy at all. Cisneros means they contain language that is common in poems, without being locked into poetic structure.

Many students will identify with the themes in this book. In HOMS, a girl is trying to find her own identity in difficult circumstances. She has aspirations for the future (something students will investigate in depth), but those aspirations change. As the book progresses she becomes more mature and less “selfish” (her term). She comes to understand that her community is a vital part of who she is now and will be in the future.

Throughout the unit students will move flexibly between reading and writing. As with poetry, many of the reading activities require short, written answers. In addition, there are many longer activities building student facility with opinion and narrative writing.

This unit is unique in requiring students to return to the same vignettes many times. The lessons build upon each other, and it is important that students grasp the concepts in earlier lessons. It is better to spend more time on those lessons, and miss later ones, than leave the class confused. In piloting we have found students of this age can successfully grapple with this text and these ideas, as long as they are encouraged to be persistent.

NOTE: The CKLA Grade 4 Contemporary Fiction unit has slightly different print components than other units to match its approach.

Unit 8: Treasure Island (26 Days)

Reader: *Treasure Island*

This unit examines the fiction genre through a classic novel, *Treasure Island*. Students will focus on character development, setting, and plot, as well as literary devices, while reading an abridged version of Robert Louis Stevenson’s popular adventure story. It is important for students in the upper elementary grades to read longer works of fiction and trace the development of plot, characters, and literary elements over the course of a novel; this unit will provide students that opportunity. In addition, this text presents an opportunity for students to learn about the adventure story as a unique subgenre of fiction. Students will also be exposed to other relevant aspects of the text, such as geography, pirates, and sailing.

Research Unit: Energy: Past, Present, and Future

(19 Days)

Reader:

Students will become tomorrow's problem solvers in this study of energy in the United States. Analytical reading skills are developed by examining the challenges of early energy innovators. The students will then read about current energy practices and young energy change makers across the world. Throughout the unit, students will conduct research into different sources of energy and present a proposal, putting them in the shoes of future energy innovators. The students will use the knowledge sequence in this unit to:

- Collaboratively analyze texts to identify cause-effect and problem-solution relationships,
- Generate questions and conduct research about energy.
- Write an opinion essay making their case for a fuel of the future.
- Create energy proposals using primary and secondary resources.

Note: In this unit, an end-of-year (EOY) assessment is provided and should be administered at the end of the unit.
